DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. Page 26 line 20 has a division sign, \div . It is not clear what was intended, but this is not right. Likewise claim 6.
2. The term "partly aqueous" is unclear. A solution is either aqueous or it is not.
3. The end of claim 1 violates the preamble. According to the start of the claim, the material prepared is either the acid or the Na salt. However, the end of the claim says that the product is obtained as the Na salt or could also be the salt of some "pharmaceutically acceptable inorganic acid." This latter option is not provided for and should be deleted.
4. "General" (in claim 2) is indefinite. A formula cannot be both general and specific. Deletion is suggested.
5. Claims 3-4 must end in a period.

Art Unit: 1624

6. A comma or the word "or" is needed before the last item in the Markush list of claims 3-4.
7. The term "very pure" is unclear in claim 2. How pure does that have to be?
8. Claim 5 is improperly dependent on claim 1. A claim must further narrow the claim on which it depends. This does not. The claim needs to be put in independent form.
9. Claim 6 is improperly dependent on claim 5 and also on claim 1.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of copending Application No. 10916952. Although the conflicting claims are not identical, they are not patentably distinct from each other because both have the same critical step of the condensation with the benzathine salt, the daughter case just being a little broader.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1624

Specification

The abstract is objected to as too vague. It fails to convey the actual structure of the final product or the critical use of benzathine.
